Proposals by discipline and research theme

Experimental shifts scheduled by Diamond by main subject area for 2023/24

- Others
- Archaeological and Cultural Heritage
- Biology and Bio-materials
- Chemistry
- Earth Science
- Energy
- Engineering
- Environment
- Food Science
- Information and Communication Technology
- Materials
- Medicine
- Physics
- Technique Development

* Not all proposals are attached to a science area. This explains the difference in delivered shifts (+233 have no science area in the same access route and instruments)

Gold Award – Employer Recognition Scheme

Diamond has achieved an Employer Recognition Scheme (ERS) Gold Award.

The award is the highest badge of honour within the scheme that recognises the positive role that an employer plays in supporting the Armed Forces community and their families.

EMPLOYER RECOGNITION SCHEME

GOLD AWARD 2023

Proudly supporting those who serve.

Diamond signed the Armed Forces Covenant in 2019, confirming our commitment to treat fairly those who serve or have served in the armed forces, and their families.

The Covenant is a promise from the nation to actively support the Armed Forces Community and ensure they are not disadvantaged in their day-to-day lives.

Diamond Extension Building Update
