End State status update

Started developing the End State for the site in 2013 with discussions on how to achieve the next planned land use, taking into account a range of sustainability factors

10+ years of technical assessment and stakeholder engagement...

Environmental Permits

- December 2024 – Submitted applications to the Environment Agency for Environmental Permits to support implementing the Site End State
- EA will consult with local communities on applications

Planning application

- Mid-2025 – Submit planning application and Environmental Statement (including detailed habitat assessments) to Dorset Council
- Dorset Council will also consult with local community on application
- In parallel, regulators will assess the technical aspects of the case(s).
