Dear Councillor,

Nuclear Reactors (Environmental Impact Assessment for Decommissioning) Regulations 1999, as amended (EIADR)

Hinkley Point B – Site Licence no. 62C

Regulation 11 – Information as to Decisions

On 29 October 2025, ONR granted consent for a project proposed by EDF Energy Nuclear Generation Ltd to decommission Hinkley Point B nuclear power station. Since then, we have informed the public of our decision by publishing news of the decision on our website and via social media. However, we would like to reach a wider audience in discharging our duties to satisfy the following EIADR requirement:

“11.(1) Where an application for consent to carry out a project is determined by the ONR, the ONR shall as soon as possible”...

...“b) inform the public of the decision by publishing a notice containing the relevant information in a newspaper circulating in the locality of the site concerned, or by such other means as are reasonable in the circumstances”.

Accordingly, we would like to communicate the news of the EIADR consent via the Hinkley Point Site Stakeholder Group (SSG). Therefore, I kindly request that you share the news of the consent with the SSG membership and, if possible, arrange for the news to be shared on the SSG's website. The Project Assessment Report contains the relevant information and is on ONR's website at:
<https://www.onr.org.uk/working-with-others/public-participation/consultations/closed-consultations/hinkley-point-b>

We now consider our duties under regulation 11 of EIADR to be fully discharged and I thank you again for your cooperation in this matter. If you would like to discuss this further, please do get in touch.

Yours sincerely,

Dan Hasted
Director of Regulation, Operating Facilities, ONR

Distribution List

ONR
